PROFESSIONAL PROFILE

I'm a product designer with experience across e-commerce, logistics, public utilities, and B2B and B2C software projects. Throughout this path, I've led end-to-end product design, working closely with both users and stakeholders, and collaborating with product, technology, business, and marketing roles.

Along the way, I've gained experience designing for — and understanding the importance of — both the person who operates a process from the inside and the person who receives the result from the outside: the internal processes that keep a company's backstage running, and the goals of both users and the business.

I've learned to work with autonomy and push projects forward, as well as to ask for help when I need it. I've also learned that teamwork goes beyond design peers, and how important it is to rely on people who see the business from a different angle: product, technology, business, or marketing.

PROFESSIONAL EXPERIENCE

Mercado Libre — *SSR UX Specialist*

June 2022 – May 2026

- Designed complex operational processes end to end — negotiation, billing, and claims — simplifying flows and information architecture for both internal teams and end users; as a team, we reduced claims by 70% and generated financial recoveries estimated in the millions of dollars.
- Led research and discovery (discovery, interviews, co-creation workshops) with users and stakeholders to identify friction points before designing solutions.
- Prototyped from low to high fidelity and validated solutions through user testing before implementation.
- Collaborated with Product Managers, business leaders, and technical teams on the conception of POCs and MVPs, contributing technical feasibility and design criteria.

Intergrupo SoftwareOne — *Senior UX Specialist*

November 2021 – June 2022

- Designed the information architecture and navigation flows for EPM's Home Customer Portal, an enterprise portal for service management, billing, and self-service.
- Consolidated a shared Design System in Figma across teams and technology vendors, with reusable components that reduced inconsistencies.
- Led the UX team assigned to the account, working directly with stakeholders, business, and development throughout the project lifecycle.

ASISTE APP — *Product Designer*

January 2021 – November 2021

- Designed user flows, information architecture, and the design system for a B2C platform from the ground up.
- Conducted user research (interviews, surveys, stakeholder maps, user personas, journey maps) and ideation sessions to define design and business requirements.
- Validated prototypes through user testing and A/B testing, iterating the design based on results.

Grupo Telvinco SAS — *Brand Designer · UX & Service Designer*

September 2016 – December 2020

- Mapped user journeys using Service Design tools to identify friction points and improvement opportunities across brand experiences.
- Participated in research, conceptualization, and validation of digital solutions centered on the user, with a focus on consistency across channels.

EDUCATION

Postgraduate Specialization in Product Design Management — Universidad EAFIT (January 2022 – December 2022)

Bachelor's Degree in Digital Design and Multimedia — Universidad Colegio Mayor de Cundinamarca (January 2012 – December 2017)

SKILLS & TOOLS

Product Design: Figma (Design Systems, reusable components, high-fidelity prototyping), FigJam, Adobe XD, Adobe Suite

Research & Validation: interviews, user personas, journey maps, usability testing, A/B testing

Methodologies: Design Thinking, Double Diamond, Service Design, Jobs to Be Done, Scrum

Collaboration: Jira, Monday, Notion, Slack, Google Suite, Microsoft Suite

AI Tools: Claude Code, Claude Design, Figma Make, Gemini, GPT, Notebook LM

LANGUAGES

Spanish — Native

English — A2 (currently improving)
